Teachers' Association

About forty teachers from different parts of this Inspectorate attended the Institute meeting held at Red Deer the 6th and 7th. The weather was unfavorable for those from a distance to attend or the number of teachers in attendance would have been greater. Those who did avail themselves of the opportunity of hearing the lectures of Bryan and McCuaig of the Provincial Normal School obtained hints on teaching and presenting subjects to their classes which will enable them to regain any loss of time which the two days absence from their schools would apparently seem to cause.

On Wednesday the 6th the teachers and Board of the Red Deer School entertained the visiting teachers in the Odd Fellows Hall. And as the teachers of Central Alberta are nearly all ladies a number of the young ladies and gentlemen of the town were also invited. The ex-teachers of the school and the Board of Trade with their wives were also invited. There was a short program composed of speeches by Messrs. Bryan and McCuaig, elocution by Mr. Saunderson, singing by Mrs. Dr. Collinson and Mr. Hoar and music by Mrs. Choate.

Council Meeting.

Council Chamber, June 7th.

A special general meeting of the Town Council met this day at 8 o'clock, His Worship, The Mayor, presiding.

Present Councillors, T. A. Gaetz, Bawtineheimer, Gaetz, Stephenson, Pidgeon and Botterill. Mr. Jamieson and J. J. Gaetz appeared before the Council as a committee from the Agricultural Society to see if arrangements could be made whereby the Municipality

would take over the grounds and pay off the indebtedness, and also asked that arrears of taxes be remitted.

Petitions:—
Red Deer Memorial Hospital for \$8000 to pay off Victorian Order of Nurses \$2000, and balance of debt on building, \$4000.

The Sec'y-Treas. was instructed to procure an itemized account from Mr. J. T. Moore of his expenditure as per statement rendered in respect to the Banquet.

H. H. Gaetz-Bawtineheimer, that the property committee be instructed to meet a committee of the Agricultural Society if such be appointed for the purpose of considering a proposition regarding the purchase by the town of the Agricultural Society property.

H. H. Gaetz-T. A. Gaetz, that the Solicitor be instructed to prepare a by-law for the granting of \$3000 to Hospital and that the Property committee be instructed to take up the description of the land with the Board.

Bawtineheimer-T. A. Gaetz, that the solicitor be asked to take up the description of the land with the Board.

Bawtineheimer-T. A. Gaetz, that the solicitor be asked to take the necessary steps to have the lane running through the C. P. R. property at the rear of block 12 closed.

Botterill-Pidgeon, that the report of the Property and Parks committee be adopted in so far as it relates to the purchase of land at Intake from the Red Deer Lumber and Brick Co. subject to the approval of the ratepayers to a by-law for the purpose of raising the necessary funds.

Gaetz-Botterill, that the solicitor be instructed to prepare a by-law for sum of money regarding the purchase of property from the Lumber and Brick Co., also that Sec'y-Treas., be instructed to inform Mr. Brumpton re the action of the Council.

Gaetz-Botterill, that the Board of the Methodist church be granted providing that the consent of property holders whose insurance is affected by same is received, and providing they agree to remove the building outside the fire limits as soon as new building is completed.

Botterill-Stephenson, that the report of Property and Parks Com. be adopted as read.

H. H. Gaetz - T. A. Gaetz, that the \$500 recommended be granted to the Hospital for maintenance account be authorized to be paid as soon as Hospital is open.

H. H. Gaetz-T. A. Gaetz, that the recommendation of the Finance Committee for granting of \$250 for payment on account of Red Deer pamphlet be adopted.

Council adjourned.

Methodist Conference

CALGARY.
The annual meeting of the Calgary district of the Methodist church commenced Wednesday morning at ten o'clock in the parlors of the Methodist church. Rev. Dr. McDough president of the conference presiding.

Francis J. Johnson, B.A. of was recommended for full ordination.

M. Ing. Morley probationer of two years to be continued as probationer.

Alfred M. A. Lyle, of Lincham probationer of three years, to be continued.

Henry F. Jarret Springbank the same.

Reginald A. Piper Robt. A. Jacobson and C. W. Bishop of Calgary, probationers for three years, to be continued.

Geo. S. Wood of High River, and Frank Bushfield will be continued probationers of one yrs.

Wm. Holmes Irwin was recommended to be received as a probationer for the ministry.

THE GATE THAT WON JANE

By FRANK H. SWEET

Copyright, 1905, by F. A. Whitehead

"No, ye can't have Jane," snarled old Tilton ungraciously. "She's my brother's daughter, and I'm not averse to her, but ye ain't nothin' but a hired man with no prospects. I don't see what Jane was thinkin' on to say ye could ask me. Ye can't have her, and that's all there is to it."

Zeko opened his mouth as if to protest or to strengthen his case by further argument, but Tilton's face was grim and forbidding, and he knew the old man too well to weaken his chances by causing useless irritation. He turned away.

Just at that time they were near the farmyard gate, Zeko digging post holes and old Tilton patching up a wheelbarrow, when the drummer of an ag-

"HOW WOULD YOU LIKE TO MAKE A TRADE?"

ricultural warehouse appeared, but instead of going straight to Tilton he stopped at the gate and began to examine it curiously.

"Queer contrivance, that," he said, presently. "Good idea, though. Grand good idea. How did you happen to think of it?"

"It's one of my hired man's dilly-dallies," replied Tilton gruffly. "He's forever up to something of the sort. 'Wastes half his time.'"

Zeko dashed a little, but did not look up.

"No wasted time about that," declared the drummer emphatically. "It's a valuable idea. There's money in it."

"Money?" questioned Tilton eagerly. Then he saw one of the horses approaching his body through the open doorway of the barn, and he rushed off. He would have sent Zeko only if he preferred him to continue at the post hole digging.

"So it's your idea, is it?" said the drummer as he crossed to Zeko's side. "Going to have it patented, of course?"

Zeko laughed. "Patented?" he echoed. "That foolish thing? Why, it's nothing but a lot of stones and two hinges pushed to the gate will shut it."

"But that's just the sort of thing which usually proves valuable," persisted the drummer. "The simpler the device, if it's useful, the better. You'll make a mistake if you don't protect the idea."

"Then I guess I'll make the mistake," said Zeko carelessly. "Patents cost money, and I haven't any. Besides, if I had, I wouldn't risk 50 cents on that foolish thing."

The drummer regarded him thoughtfully. "Look here," he said suddenly. "How would you like to make a trade?"

"I would appropriate the idea for myself if I did business that way," he said. "Still, I like to make money wherever I see a chance. My house does a good deal in patent articles, and I can generally guess pretty close whether there's money in an idea or not. Now, if you say so, I will put this through at my own expense and keep half the profit. What do you say?"

"You mean, use stones like that, and all?" asked Zeko skeptically.

"No, it's only the idea I want. We would find some substitute for the stones."

Zeko's indifference began to vanish. "If you really think it's worth something," he said doubtfully, "I'll be glad to have you fix it up. But I don't want you to lose money. There's a little wonderingly, if thought patents were made of pulleys and springs and—such things and that 'twas genius who got 'em up who studied years and years to make 'em all right."

The drummer smiled. "It's that way sometimes," he said, "but not always. I have known inventors to have their ideas come to them in a moment, in a flash of thought. But suppose we fix this up now."

He opened a notebook and wrote for some seconds, then he tore out the leaf and handed it to Zeko.

"It's a sort of agreement for you to put your name to," he said. "Read it first, though. Never sign anything until you know what it is. Let's I will have regular papers made out for both of us."

He read the paper and signed his name with the pen which the drummer held ready. Then he resumed his digging. A few moments later Tilton, came hurrying back.

"The drafted horse at a full peak of good corn," he began wrathfully. "No supper I get this night. Now, what is it about that gate business? How's there money in it?"

"By getting the invention patented," answered the drummer carelessly. "But Zeko and I have fixed that up. Well, I must be going."

"But look here," exclaimed Tilton. "Ye must talk with me 'bout that gate. It's mine. Zeko ain't nothin' to do with it."

"Oh, I don't want the gate," said the drummer coolly. "It's only the idea, and that, I believe, belongs to Zeko. Goodbye."

Tilton stared at him as he walked away, the wrath deepening on his face. Suddenly he availed round to Zeko.

"What did ye get?" he demanded. "Come, hand it over."

"I didn't receive it in money," Zeko answered.

"Stop!" roughly. "Don't tell me your yarns. Didn't I hear the man say ye ain't fixed it up? Now, how can ye look at me straight?"

Zeko did so, with a half smile. "He's to pay for getting out a patent," he replied, "and have half what we make."

"As ye didn't get any money?"

"Not a cent."

Tilton looked at him sharply, but there was no deceiving the straightforward face. Even he realized the fact.

"Then ye're an idiot," he snarled. "The man was set on the idea. I could see that from the way he spoke. He'll get fifty or a hundred dollars just as easy as nothin'. Mebbe we could have made a trade for a lot of his tools."

"No, I won't," he said. "I'll never let the man get it. In spite of what he said Zeko could not bring himself to believe that the simple contrivance was of any value. Even when the regular papers came, with imposing seals and blank spaces for him to sign his name, he regarded them more as interesting novelties than as anything that would affect his future.

But one day a letter came which caused his eyes to open wide with amazed delight and, after a half hour of hard thinking, carried him into the house after his Sunday clothes. It was nearly dark when he returned from the town. Old Tilton met him at the barn door, his face dark.

"What d'ye leave work for without my say?" he demanded.

"Business," replied Zeko. "I heard you say 'oller day the mortgage had run by and that if ye didn't raise the money soon they'd be selling you out. So I've been to a lawyer and had it fixed over in my name to save you trouble. You can pay me whenever it suits you. See?"

In answer to the look on Tilton's face, get a check for two thousand on the patent and am likely to get about as much more every year. I think I'll buy Dickson's farm that joins ours. Now, if you don't mind, I'll go in and talk with Jane awhile."

He looked at Tilton inquiringly, and after a few moments of wrathful glances the old man nodded sulkily.

Forever Distinguished.

When Washington made his tour of New England he was the guest of his friend, Oliver Ellsworth, of Windsor, Conn. Ellsworth's biographer, William Garrett Brown, mentions that the tour was the first in the history of Windsor and of the Ellsworth family.

Washington wrote in his diary on Oct. 11, 1790, "I arrived at Windsor, breakfasted at Mr. Ellsworth's at Windsor on the way to Springfield; but the morning proving very wet and disagreeable, I did not leave Windsor until about 11 o'clock. I did not get out until half after that hour. I called, however, on Mr. E. and stayed there near an hour."

Tradition has long been lengthened out and embellished with incidents of an old-fashioned patriotic flavor the single fact that Washington at Ellsworth's house in Windsor was the guest of one of Ellsworth's young sons to the Washingtons at Hartford to present the invitation, of his trip to the north of feeling the greatest man in the world and of his surprise, relief and disappointment to find only a quiet old gentleman dressed in white and his several sons.

There is also the story of Washington's taking on his knees the youngest son of the Ellsworths, and his gentle and gentle tone the child of the Derby man.

The homes Washington then visited were therefor forever distinguished. For and many a New England house was richer by the priceless association so valued by the owners of Ellsworth-Youth's Company.

Dinner For Three.

Two newboys stopped before a fruit stand, says a writer in the Denver Post, and one of them asked the price of apples. "Five cents each," said the stand man, pointing to one pile. "Two for 5," indicating another.

"Gotta have two for 5," said the boy, starting away.

"All right," said the stand man, "here's three. Gimme your nickel."

The boy took the apples and paid over the nickel. He gave one to the other boy.

"What are you going to do with the extra one?" asked the other.

"The first boy did not reply. On we next corner was a blind man seated on a stool. The boy with the extra apple approached him.

"Here," he said, giving the fruit to the blind man, "here's an apple for you."

"As the two boys moved away the one who had bought the apples said:

"That fellow didn't have any dinner. I'm hungry and I'm cold, and he didn't have a thing to eat."

Sure to Get the Job.

"The salary you ask is reasonable enough," said Jones to the man who applied for position as chauffeur. "Can you give references from your last employer?"

"Oul, monsieur, in one month," the applicant replied.

"In one month? Why not now?"

"Hélas, monsieur," he said, "my former employer is in the hospital, and it will be quite a month before he will be able to write again."—New York Press.

Plaster Casts.

Those who have plaster casts that they wish to preserve may protect them from dust by brushing them with a preparation of white wax and white soap half a teaspoonful of each and with a quart of rain or other soft water. Use when cold, and when they are dried the casts may be wiped with a damp cloth without injury. To handle on casts brush with a strong solution of alum water and brush with white wax dissolved in turpentine. Put the casts in warm water to dry, using the latter, and it will have a look not unlike that of old ivory.

SAVES TIME AND LABOR.

Chick Pen That Can Be Easily and Cheaply Made by Any One.

All Handy With Tools.

In the necessary daily moving of the chick pen, time and money may be saved by having the pen made of inch thick 12-foot boards, at least a foot wide and sectioned off with a scantling beveled to form an equilateral triangle will do if numerous halls are used to form a pen, but such corners cannot be "knocked down" and stored from season to season in a pile, as the dried style can if the

LABOR SAVING COOP OR PEN. The ends of each board should be beveled to form a right angle, or 45 degrees.

In one corner a coop may be made consisting of a removable roof to fit over the sides of the pen and of a height sufficient to accommodate the birds. The coop should be placed on a level floor and its front plate may extend downward into the pen to keep the mother in the desired.

In use the time saving management consists in the method of moving as well as in the feature of "knocking down." The coop is placed in the center of a grass plot about 24 feet across in each direction and when moving time arrives the chicks are attracted to a little food at B, while the operator lifts the pen at A, and using C as a pivot, carries the point A around to D. In order to make the chicks move forward from B, when the coop is moving, the food should be placed close to the side of the pen and some more on the other side; namely at E. After a few movements the chicks learn to go forward promptly. Each day the pen is moved in the same way until it occupies the place marked C. Then it may be moved to new ground by turning on one of its corners, say F, so that for instance the coop faces D. Indicated by the dotted line. From this point as a new center the daily movement may continue as before.

Mulberry Trees in the Poultry Yard. For many years a standard recommendation that plum trees be grown in the poultry yard, to furnish food for the birds, has been in vogue. It is doubtful, however, if the purpose is to give a stock of food, this purpose as well as mulberry trees. These trees furnish abundant shade, and the fruit is a valuable food for the fowls. A writer in Practical Farmer gives his experience in planting mulberry trees for this purpose as follows:

"I will advise every poultryman who has already a yard to get a goodly number of the Russian variety in and around their poultry yards, the planting and the care of them, the best of shade and an abundance of juicy fruit for the poultry, as well as for the human family, and the best of the summer. The trees are extremely hardy, and bear annually great crops of fruit, which are valued by the fowls, and I know of no fruit that is more healthful for those who eat it. Give a stock of food, this purpose as well as mulberry trees. These trees furnish abundant shade, and the fruit is a valuable food for the fowls. A writer in Practical Farmer gives his experience in planting mulberry trees for this purpose as follows:

A writer in Practical Farmer gives his experience in planting mulberry trees for this purpose as follows:

"I will advise every poultryman who has already a yard to get a goodly number of the Russian variety in and around their poultry yards, the planting and the care of them, the best of shade and an abundance of juicy fruit for the poultry, as well as for the human family, and the best of the summer. The trees are extremely hardy, and bear annually great crops of fruit, which are valued by the fowls, and I know of no fruit that is more healthful for those who eat it. Give a stock of food, this purpose as well as mulberry trees. These trees furnish abundant shade, and the fruit is a valuable food for the fowls. A writer in Practical Farmer gives his experience in planting mulberry trees for this purpose as follows:

CUTWORMS.

Damage by cutworms to grain
and garden crops having been
reported from various parts of
Alberta, the Department of Agri-
culture at Edmonton makes the
following suggestions towards
combating the attack.

Cutworms are the larvae of
certain moths, and their habit is
to feed at night and remain an
inch or so under the surface of
the ground in the day time. A
thorough harrowing will turn
many of them up to the surface
and if this is done on a warm
sunny day, and the harrowing is
followed by a roller, a good many
of the creatures will be crushed.

For gardens, beet fields and
other small areas, Dr. Fletcher,
botanist and entomologist of the
Dominion Experimental Farms,
recommends placing here and there
bundles of any succulent weed or
other vegetation, such as alfalfa,
which have been dipped in a mix-
ture of Paris green and water,
one ounce to the pail. The cut-
worms eat the poisoned plants, then
bury themselves and die.

In hot, dry weather, these bun-
dles should be put out after sun-
down, and a shingle may be placed
on each to keep it from wilting.

Cabbages and other garden
transplants should be planted
with a piece of stout paper or tin
around them. This prevents the
caterpillars getting to the plants.
If paper is used, it should be
wrapped closely around the stem
just above the root, so that it will
not interfere with the growth of
the plant and may be easily lifted
away after the plants are estab-
lished and the danger of attack
is over. Hand-picking or dig-
ging out the cutworm whenever a
plant is seen to be cut off, should
of course always be practised.

Dr. Fletcher says the most re-
markably effective remedy against
cutworms is poisoned bran mash.
This is made by mixing half a
pound of Paris green with fifty
pounds of slightly moistened
bran.

To make it dampen a little of
bran with water containing a little
sugar, dust on some of the Paris
green and go on adding bran,
Paris green and water until the
mixture is all made up. When
ready for use it should run easily
through the fingers without ad-
hering.

In gardens, a little of this can
be sprinkled by hand around such
plants as are liable to attack.

When crops are planted in rows
a convenient way is to make the
mixture rather dry and then dis-
tribute it by means of a Planet
Jr., or other steel seeders.

In growing crops, the mixture
can be distributed by means of a
shingle and can be easily thrown
to a distance of twenty feet.

Care should be taken to prevent
domestic animals having access
to the poisoned bran; although
cases of injury from the mixture
are very rare, and indeed it is
questionable if there is really an
authentic case on record, of
poultry being poisoned by this
remedy, yet some precaution is
always wise.

British Columbia Fruit Industry

There is a decided increase in
the interest that outsiders are
taking in British Columbia, as a
fruit growing country, and a
great movement is taking place
there in that connection. The
land is now being bought very
rapidly in the fruit growing dis-
tricts. Places that a year ago
were thought to be suitable only
for mining, are proving to be very
valuable for orchards. A visitor
to Nelson recently, said that the
matter that impressed him most
was the interest taken by the
people of that mining town in

fruit gardens. This industry
has proven itself to be most pro-
fitable to the grower. The won-
derful fertility of the soil combin-
ed with the mildness of the cli-
mate, produces a perfect condition
which insures wonderful crops.

The enormous territory to the
east provides a market for every
pound of fruit that can be raised
at a market price far greater than
received by any other fruit grow-
ing country in America. At the
present time this market is being
largely supplied by Ontario,
Washington and Oregon. The
distance and time saved in trans-
portation from the east and duty
from the south gives this locality
a great advantage. The Kootenay
valley is what they call in British
Columbia, Moist Valley. Irriga-
tion is not required. In the first
place there is sufficient rain-
fall and at the same time the
sagebrush from the mountains,
which being at the immediate
back of the lake shore is sufficient
to provide moisture for the trees
in the latter part of the summer
months. The meteorological re-
cord shows the duration of sun-
shine is not exceeded by any other
locality. The winters are mild
and it is only occasional years
that the thermometer reaches the
zero mark. The fact that the
stormers make daily trips through-
out the year is sufficient evidence
of the mildness of the climate.—
Winnipeg Commercial.

EDITORIAL NOTES.

The cut worm loses no time by
wet weather.

Say something good about
Red Deer, wherever you are, to
whichever you meet.

The C.P.R. improvements are
acceptable. A new station next.

The representative of the Ham-
ilton Ontario Herald, a large and
prosperous newspaper, while in
our office the other day stated
that the people in the east were
heating a great deal about Red-
Deer. He had heard so much
about it that, while passing through
to Edmonton he determined
to stop over for one day. The
appearance of the town more than
realized his expectation.

A good industrial motto for Al-
berta would be, "What we need
we make."

Chicago canned meats need not
apply.

One good proposal at the Ed-
monton Board of Trade Congress
was that referring to the increase
of teacher's salaries, no class of
people perform a more laborious
pioneering work on such small
pay.

The Dowieites are coming to
Alberta to form a new "Zion".
Red Deer is the natural Zion of
Alberta.

The Innisfail Province complains
that our police did not arrest
the pugilist who was here some
days ago, but sent word to the
Innisfail constable to locate the
man there. Well its easier to
find a man in a small town than
in a city, you know.

A motto for the North Atlantic
Trading Co. Presto (n) Change!

Ducks in Innisfail are devour-
ing chickens. Did't know
that politics was going to be car-
ried into the poultry Kingdom.

An eastern Correspondent com-
plains that people do not love
each other. He should move to
Red Deer where all men are brothers.

During July and August, a
Wednesday half holiday in Red
Deer, for the retail houses and
their staffs. Why not?

We have an efficient and
prompt fire brigade.

Next a town Library and a
reading room.

A great storm ravages West-

Loiselle, Archambault & Co.
GAETZ AVE. - RED DEER.

Trenville.

(Too late for last week.)
School starts.
B. C. Emerson is working in Red Deer.
Born to Mrs. Wm. Bair June 2nd a daughter.
Miss Trenaman is spending a few days at McKenzie Ford, guest of Mrs. Kenzie.
Robert McKenzie of North Branch is spending a few days in this place.
P. F. Austin is still very low.
M. Tracy left on Monday to meet his wife in Red Deer.
Kenneth Johnson has gone to Golden B.C. for the summer.
A. Cherry and daughter are at Red Deer for a few days.
The C. P. R. survey camp is located now about 4 miles south of the postoffice many sales of C. P. R. have been made in the past few days and the home stands all fyled upon.
Only a year and a half ago one coming up the valley could count all the dwellings on their finger ends but now a great change has taken place, where a few yrs. ago were to be seen only bands of cattle and the hut of a "Cow boy" one will find fields of grain and in many places large frame dwellings.
The valley is well adapted for mixed farming and dairying with the railroad going through and making an easy market what was once considered only a range country will develop into one of Alberta's finest farming districts.

Hen Ranch a Success.

Some weeks ago Benson & Houlton bought the hen ranch owned by the Simpsons, situated two and a half miles southwest of Calgary. They put a man to work running the incubators and are having splendid success with the experiment. The second batch of chickens has just been hatched making a total of 650 strong, healthy chickens on the ranch. The first batch was hatched a few days before the heavy rain storm a few weeks ago and lived through the cold, wet spell in fine shape. This speaks very well for the poultry industry in this locality; at this rate it will be an easy matter to get chickens ready for the market this season.
Beside this number of chickens they have 150 hens which are laying about 100 eggs per day and have others every day of 60c. each for chickens three weeks old.—Albertan.

Gun Club Trophy.

Rules Governing the Calgary Brewing and Malting Company Challenge Gun Club Trophy.
(1) This Cup shall be called the Calgary Brewing and Malting Company Challenge Gun Club Trophy.
(2) The Cup shall be a perpetual challenge cup open to any bonafide Gun Club in Central Alberta between Calgary and Edmonton, not including these cities.
(3) A team shall be five men, each of whom shall shoot at fifteen targets, unknown angles. The club to which the team making the highest total score belongs to be holders of the trophy. American Trap rules will govern.
(4) The President and Secretary of each club shall certify in writing to the captain of opposing team before shooting, that each member of the team is a bona-fide member of the club and has been a resident of the town or district within fifteen miles of the Club headquarters for sixty days, previous to date of shoot.
(5) The following shall be trustee of the cup to whom all disputes shall be referred and whose decision will be final, Mr. W. B. Barwis of Calgary. In case it is necessary to appoint a new trustee, the Calgary Brewing & Malting Company shall appoint.
(6) The cup shall be shot for first at Red Deer, July 1st, at 2 p.m. any club to be allowed to enter one or more teams.
(7) Any club wishing to chal-

tion and make such arrangement for holding exhibitions as the Society may approve of.
Richard-Paris Jr., that the foot-ball team have use of the grounds for practice.
Smith-Willson, that this meeting do now adjourn to June 23rd, at 2 o'clock p.m. in Purdy's Hall.
JOHN J. GAETZ.
Seey.

HOMESTEAD ENTRIES.

Ottawa June.—A return brought down today at the request of Mr. Lake M. P. shows that the total number of homestead entries from 1875 to Dec. 1905, was 215,125. Of this number there have been patented 63,639 and cancelled 59,640. The total number which have neither been patented or cancelled is 88,020.

Departmental Examinations.

The annual departmental Examinations for Standards VI, VII and VIII will begin on Tuesday July 3rd, 1906. Candidates who take Latin, French and German will write on these subjects on July 9th, 10th and 11th. These examinations will be held at the following places in the Province, Edmonton, Strathcona, Wetaskiwin, Lacombe, Red Deer, Olds, Calgary, Medicine Hat, Lethbridge, Raymond, Cardston, and Okotoks.
The examinations for Standard V will begin on June 29th, in all schools throughout the Province from which applications have been received.

A MODERN PRODIGAL

By Louise J. Strong

Copyright, 1905, by P. C. Eastman

Mrs. Spencer was hanging up her sunbonnet as her son came into the kitchen with the milk.

"You're out calling early, mother," he laughed.

"I wanted to see Mr. Wilson before he left home," she replied evasively. "You'll be sure to see him in time."

"No, said he'd take it on the porch as he did his supper."

"Most of them are not so modest, sleeping in the barn and eating on the porch when they could have had a bed and come to the table." There was a sneer in her tone, unusual for her kindly nature. "And it isn't always safe to put them in the barn," she added.

"Oh, he seems a pretty decent fellow," she said, her face brightening.

"Her short, discordant laugh interrupted him an instant. John stared, then went on. "He doesn't use tobacco, and he wanted to do something for his meals."

Mrs. Spencer waited and added to the tray of food she had dropped a cup of coffee, into which she had added two lumps of sugar.

"Got to take it as you fit it whether he likes it or not, hey?" John commented, smiling and shaking his head.

The tramp seated himself on the edge of the porch in front of the open door, whence he glanced furtively and frequently at Mrs. Spencer in her place opposite him. She is little, with an absent, perturbed manner, and returned the glances with a curious expression in her eyes.

John and his wife chatted vivaciously, endeavoring to dissipate the painful thoughts it was evident the sight of the old tramp had aroused in the mother's mind. She scarcely noticed

"I MIGHT HAVE BEEN MARRIED THIS MORNING," he mused.

John and his wife chatted vivaciously, endeavoring to dissipate the painful thoughts it was evident the sight of the old tramp had aroused in the mother's mind. She scarcely noticed

"Too bad, what the old fellow in," John muttered. "Jakes he thinks of." Lizzie nodded understandingly.

As her son came out on his way to the store Mrs. Spencer put the hot down and took a roll of bills from her pocket and handed it to him, saying, "Here is the money for the interest, Johnny."

"Why, mother, who loaned it to me? I couldn't borrow it!" His eyes glowed with relief.

"I didn't borrow it. I've sold the tombstone." She put up a hand as he would have spoken. "You know, Mr. Wilson wanted it when his father died. I sold it to him this morning for three quarters what it cost just as it stands. I never ought to have put it up with no certainty that he was dead. It comes now, though, for the interest, what I got for it!"

"Why, I'll put you right on my feet!" John cried. "But you oughtn't to have done it, mother. You thought so much of father's store."

"I was a fool about it when he might be alive for all I know," said she, with self-contempt. "I mean myself the laughingstock. What more do you want?" she demanded suddenly of the tramp who had come around the house and passed as if he spoke.

"I thought I might get a job. You said you had a grocery store," looking at John. "I'll work for my keep till—"

"It isn't likely he'd want an old tramp about," Mrs. Spencer interposed brusquely.

"No, I suppose not," the old fellow assented and scuffled dejectedly down the path.

Mrs. Spencer watched him a few moments, her face pale and lips twitching; then she came back and said, "Samuel Spencer, come back here! You know if you got in once I couldn't let you go off that way! I'm an old lady, Johnny. I don't mean to be a burden to have your father straggling about the country like that, sleeping anywhere and eating any old thing. It isn't fair to you, son, but we'll have to try to keep him."

"Father?" John and Lizzie cried together. "I used to expect it at first. Mrs. Spencer buried on," but when I put up the stone I really thought he was dead. It had been so long. And I might have married and been a widow. I was afraid of the tramp, who stood in a downcast silence. "I might have married this minute. I could have been. What then?"

"If you'd been married again, Harriet—I didn't think you would, though—but if you had I'd never let you know I was alive. And I don't mean to be a burden to you. There's lots of work in me yet," he quavered.

"You don't look it, and there was never any too much of your best, but at course you've got to starve. I guess

he can do errands and mind the boy, Johnny."

John shook hands heartily with his unfamiliar father, whom he could not remember, introduced his wife and exhibited the child named for his supposed defunct grandfather.

"You've got to clean up and shave and have that shag of hair clipped. There's some of your old duds upstairs, decent ones," Mrs. Spencer laid down the law, then turned to John again. "I expect it'll raise a great racket, selling the tombstone and all, and I couldn't have sold it if I hadn't recognized him last night, Johnny. Dear knows what folks'll say." She flinched as the tramp, who dropped shamefacedly, but with a twinkle in his eyes.

"I've got some things at the depot," he explained meekly when she stopped. "Though I didn't know 'tramps carried baggage," she snorted.

"I'm not a professional tramp, only in the way of running from Dan to Beulah. That was always my thing, you know, Harriet. But I'm getting."

"You're getting too old and worn out to be a tramp," she said, her face brightening. "You've come home now," she interrupted a little bitterly.

"You always had a good heart, Harriet," she went on, her face brightening. "I was getting too old and worn out to be a tramp," she said, her face brightening. "You've come home now," she interrupted a little bitterly.

"You always had a good heart, Harriet," she went on, her face brightening. "I was getting too old and worn out to be a tramp," she said, her face brightening. "You've come home now," she interrupted a little bitterly.

SUNLIT ROOMS.

A Southern Exposure is the Best For All Households.

Sunlight is nature's most health giving scavenger. A house without sunlight is unhealthy and unsafe for human occupancy, and it is necessary not only to have some sunlight, but to have as much of it as possible. It is, of course, not feasible to admit the direct rays of the sun to every room of a house. The typical plan of all houses is square or rectangular, and at least one side of the house is entirely beyond the reach of the sun. The other three sides, however, can receive more or less direct sunlight, and the problem of the plan is thus reduced to arranging the various rooms so that the amount of sunlight is adjusted to their uses. And it must be sunlight, for mere light itself is not sufficient. The rays of the sun have curative and cleansing properties that nothing else has.

It is generally admitted that a southern exposure is the best for all houses and should be obtained whenever possible. It is immaterial whether the entrance be placed on this side or not, so long as the rooms most in use open on to this side. The entrance hall, the main entrance front will also be the front on which any important room opens, and in large country houses the old distinction of a front and back to the house has disappeared, and instead we have the entrance front and the garden front. The service and servants' quarters, so long regarded as characteristic of the back of a house, may be relegated to a side end or placed in a wing that abuts directly off the entrance front. In such cases it must be well screened and its purpose thoroughly subordinated. —American Home and Garden.

It is generally admitted that a southern exposure is the best for all houses and should be obtained whenever possible. It is immaterial whether the entrance be placed on this side or not, so long as the rooms most in use open on to this side. The entrance hall, the main entrance front will also be the front on which any important room opens, and in large country houses the old distinction of a front and back to the house has disappeared, and instead we have the entrance front and the garden front. The service and servants' quarters, so long regarded as characteristic of the back of a house, may be relegated to a side end or placed in a wing that abuts directly off the entrance front. In such cases it must be well screened and its purpose thoroughly subordinated. —American Home and Garden.

FOR ANAEMIA YOU MUST HAVE IRON

And Anyone Can Use Iron, As It Is Combined With Other Ingredients In Dr. Chase's Nerve Food.

Anaemia or bloodlessness is indicated by paleness of the lips, the gums and the eyelids, and is most frequently found in girls and young women.

Other symptoms are deficient appetite, impaired digestion, irritable temper, shortness of breath, dizziness, fainting, headaches, easily fatigued, depression and despondency.

The blood is lacking in the life sustaining power which is necessary to the proper working of the bodily organs, and can only be restored by the use of iron, as any qualified physician will tell you.

But iron alone cannot be taken into a weakened stomach. In Dr. Chase's Nerve Food, the iron is combined with other ingredients so that it can be easily assimilated into the blood, and thus immediately and lasting benefit to the system.

And more than this, Dr. Chase's Nerve Food, through its action on the nerves, sharpens the appetite and aids digestion, so that help is also afforded in deriving the full benefit from the food taken into the body.

On account of these two ways in which it helps, the Nerve Food is the most effective treatment for anaemia, and similar wasting diseases that was ever compounded. Note your increase in weight while using it.

Mr. Albert Sumner, Willow Bunch, Sask., writes:—

"I used the two boxes of Dr. Chase's Nerve Food which I ordered from you and have found it to be an excellent medicine. It has given a run down system, and I have recommended it to my people."

Dr. Chase's Nerve Food, 50 cents a box, 6 boxes for \$2.50, at all dealers, or Elmhurst, Bates & Co., "Toronto." The portrait and signature of Dr. W. Chase the famous receipt book author, are on every box.

For further particulars apply

Wm. W. Howe, Auctioneer & Valuer, Red Deer and Everts.

Board of Trade Congress.

(Continued from page 4)

The convention approved of the resolution of the Moose Jaw board of trade, providing for the maintenance of the hospitals by public funds collected by local improvement districts and municipalities.

The demand for improved postal facilities evoked many powerful speeches condemnatory of the action of the postal department in accumulating surplus at the expense of efficiency. Mr. W. McCausland, of Regina, said that a universal cry had gone up from the West, but the authorities at Ottawa seemed to be unable to grasp the conditions in the West. The resolution was unanimously adopted with a suggestion that a representative of the Post-master General be located in the West, with power to act without reference to Ottawa in cases of necessity.

A lengthy discussion ensued on the encouragement of the beet sugar industry of Alberta, and it was finally adopted with the words "sugar limitations" erased and products grown and manufactured in the West substituted. The original motion was objected to, on the ground that it was class legislation.

Government ownership of telephones was approved with the words "or municipal" added, to meet the objections to Government monopoly. The convention also adopted the resolution of the Edmonton Board that forest reserves be established throughout the West. On this matter a powerful speech was made by W. Pearce of Calgary, who in the course of his remarks, spoke of the effect of timber on the water course saying that the flood on the Saskatchewan in 1899 would not have occurred had its banks not been deforested, and added further that in thirty years the flat of the river would be uninhabitable if this condition of affairs continued.

Regina.—A motion for the removal of duty on alcohol that it may be used as cheap fuel.

Dairying As a Business.

It is no exaggeration to say that Dairying in this country is one of the most profitable branches of Live Stock Husbandry. Probably, all things considered, one year with another, it is the most profitable branch of Agriculture, as there is little, if any, chance work about it, as has been proven to be the case with Beef, Wheat or other branches. So why not get at the most profitable branch of your business and milk Cows. It can be made still more profitable by using a Separator that will get all the cream from the milk. The most successful Dairy men use the De Laval and get all the butter fat. These Machines are easy to operate; easy to clean, and very durable.

We sell them at a very reasonable price and on easy terms of payment; So **WHY BE WITHOUT A SEPARATOR?**

We have our Blacksmith Shop running full blast now and are prepared to do any kind of Blacksmithing and Horseshoeing. **GIVE US A CALL.**

SPRINGBETT & BOWHEY.

Loiselle, Archambault & Co.

owing to the scarcity of room for the goods in stock, have decided to have a sale on

Apply A McPHERSON, Box 163 Red Deer.

Twine Twine Twine

Now Mr. Farmer after this fine refreshing rain, you are assured of another bumper harvest. Then what about your twine. "Don't" leave off ordering until you want the twine, how are we to judge what amount will be required? We don't even know the amount of your acreage. Don't allow the shortage that occurred last year to be repeated and when placing your order kindly keep in mind the FIRM WHO DID NOT TAKE ADVANTAGE of the shortage and raise the price to 18 and 20 cents per lb. We have a fair living profit and our price is the same to everybody, all things being equal.

If you will call at our office or drop us a line simply stating the amount of twine you expect to use, you will greatly oblige us and besides you can then rest assured that you will have no fancy price to pay. We don't ask you to begin an order compelling you to take such a quantity. Simply give us an estimate of the number of lbs. that you will require. Don't forget we have all grades of the Famous McCormick Twine.

Give us a call and at the same time you can get our easy terms on the Molote Separator; besides, we carry the most complete line of Farming Machinery to be found in the west.

Yours for best service,

Latimer & Botterill,
Red Deer and Calgary.
